

Summer Math Activity Choice Board for students entering Grade 1

First grade students are being asked to review the math choice board options below and complete a minimum of three boxes. The middle box highlighted in yellow is a required activity. The other two activities can be selected from the remaining boxes in no particular order. If you really want to be challenged, complete as many boxes as you can during summer vacation. Feel free to complete an activity multiple times as repetition reinforces learning.

Take a picture of your snack after you make two groups of 10.	Collect shells at the beach and create tally chart to count how many.	Collect 100 items and sort into groups of ten.
Exercise to the count of 10: 10 jumping jacks 10 hops 10 jumps 10 leaps 10 squats	Required Activity: Create a shape poster sorting pictures of different shapes.	Use pictures or stickers to create an addition or subtraction problem.
Use your snack to create a subtraction problem. (ie. I have 10 pretzels and I ate 3.)	Create a countdown to the first day of school!	Play three math games. www.mathplayground.com or www.splashmath.com

The required real world example is due to your child's teacher on or before **Friday, September 13, 2019**. *All students who have met the summer math requirements will be recognized for their efforts in September.*
